

Gloo Acquires XRI Global, Unlocking Advanced Multilingual and Voice AI Capabilities to Expand Market Opportunity

November 25, 2025

Strategic acquisition will accelerate growth by embedding advanced multilingual AI across the Gloo platform

BOULDER, Colo., Nov. 25, 2025 /PRNewswire/ -- [Gloo](#) (Nasdaq: GLOO), a technology platform serving the faith and flourishing ecosystem, announced it has acquired [XRI Global](#), an AI company pioneering voice AI and multilingual technologies designed to engage people across thousands of languages.

XRI's capabilities allow Gloo to increase the depth and market potential of current technology solutions offered through Gloo AI and Gloo360.

Founded in 2018, XRI develops custom multilingual and low-resource language AI solutions for organizations across health, faith and humanitarian sectors. Today, there are over 7,000 languages in the world, and around 6,800 are left out of modern AI innovations. XRI has developed a research-backed methodology that has proven successful at designing AI which can scale to thousands of languages, even those without training data or a writing system.

XRI has already built AI models for over 30 languages in just the past 18 months. The XRI team holds PhDs in machine learning, computational linguistics and theoretical linguistics, with backgrounds at Meta and Google.

"Together, Gloo and XRI can pioneer a new category: mission-aligned AI infrastructure that is global in reach, grounded in shared values, and designed to accelerate human flourishing," said Daniel Wilson, CEO of XRI Global. "AI investment is surging across the development sector, yet the language gap prevents these tools from reaching the very communities they are meant to serve."

XRI brings a robust history of projects across the broader faith and flourishing ecosystem, including being a past subgrantee of a Gates Foundation project via Clear Global, and a provider of end-to-end data-collection solutions that accelerated expansion into new languages for the Innovation Lab of Every Tribe Every Nation.

"As AI transforms the way the world communicates, billions of people risk being left behind simply because their languages are not represented in today's frontier models," said Steele Billings, president of Gloo AI. "By combining XRI Global's world-class engineering with Gloo's values-aligned approach to AI, we are taking a bold step toward closing that gap within the faith and flourishing ecosystem."

Now, Gloo and XRI can scale trusted multilingual AI across the faith and flourishing ecosystem. This will unlock new international markets, enhance the value of Gloo's platform, and ensure communities across thousands of languages can fully participate in the future of technology.

Forward Looking Statements

This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical facts contained in this press release may be forward-looking statements. In some cases, you can identify forward-looking statements by terms such as "may," "will," "should," "expects," "plans," "anticipates," "could," "intends," "targets," "projects," "contemplates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of these terms or other similar expressions. Forward-looking statements contained in this press release include, but are not limited to, statements about the expected impact of the XRI acquisition on our business. Forward-looking statements are subject to known and unknown risks, uncertainties, assumptions and other factors. Some of these risks are described in greater detail in our Prospectus dated November 18, 2025, filed with the Securities and Exchange Commission (the "SEC") on November 19, 2025. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause our actual results to differ materially from those contained in any forward-looking statements we may make. These factors may cause our actual results, performance or achievements to differ materially and adversely from those anticipated or implied by our forward-looking statements. Furthermore, if our forward-looking statements prove to be inaccurate, the inaccuracy may be material. In light of the significant uncertainties in these forward-looking statements, you should not rely on these statements or regard these statements as a representation or warranty by us or any other person that we will achieve our objectives and plans in any specified timeframe, or at all. We undertake no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.
